Cannabis Oil 250/500/1000mg

Canidol®-FS

Canidol®-FS is a natural food supplement, derived from Cannabis Sativa—L, containing Cannabidiol and a full range of cannabidiol terpenes.

Canidol®-FS 25mg/ml, 50mg/ml and 100mg/ml are presented in 10ml dropper bottles, designed solely for sublingual use.

Canidol®-FS is sold as a self-selection retail product in clinics and pharmacies, where healthcare advice can be provided. Any location selling Canidol®-FS has completed a training program on cannabinoids and drug interactions.

Usage of Canidol®-FS

Canidol®-FS may be useful as an add-on therapy in a number of inflammatory and pain-based conditions, however no medical claims regarding this product are possible.

Canidol®-FS has compulsory reporting, so you must tell your doctor, nurse or pharmacist if you have any unusual side effects not listed in this leaflet.

In order to get best use of your Canidol®-FS, we recommend joining a UK Cannabis Clinic. These are listed on the www.ukcannabisclinic.com website, or ask your local pharmacist.

Warnings and Precautions

Before you use Canidol®-FS talk to your doctor or pharmacist if you:
- suffer from any allergic reactions
- suffer from epilepsy
- suffer from any liver, kidney or heart disease
- suffer from schizophrenia or depression
- have an irregular heart beat/rhythm, including a fast or slow pulse
- have high blood pressure
- are addicted to drugs or alcohol
- are taking other medicines.

You and your partner must ensure reliable contraceptive precautions are taken during your treatment and for at least three months after you stop taking Canidol®-FS.

Interactions with This Product

If you go into hospital you must tell the staff all the medicines and food supplements you are taking, including Canidol®-FS.

Some drugs interact with Canidol®-FS. Therefore it is important to talk to your doctor or pharmacist about any medicines and supplements you are taking such as, but not limited to:
- Sedatives
- Hypnotics
- Antidepressants
- Blood pressure medications
- Heart medicines
- Cannabis (do not smoke or ingest any other cannabis products while taking Canidol®-FS)
- Cancer medications

Proper Use of This Product

Shake bottle before use
Usual Dose:
Take half to one pipette once or twice daily. Canidol®-FS is to be administered under the tongue, in doses of no more than 1 milliliter (one full pipette) at a time. It should be held under the tongue for as long as possible (ideally 5 minutes or more).

No food or drink should be consumed for 15 minutes after the dose is absorbed. Canidol®-FS should not be swallowed or added to food, as it will not be sufficiently absorbed in the gastrointestinal tract.

Do not exceed this recommended dose unless directed to do so by your Healthcare Professional.

Do not smoke or vape for at least 15 minutes after you have taken your dose.
If you miss a dose, take the next dose and carry on as before, DO NOT DOUBLE YOUR DOSE.
SIDE EFFECTS & WHAT TO DO ABOUT THEM

CANIDOL®-FS has a low side effect profile and is generally well tolerated, however, as with many products, individuals can have reactions to CANIDOL®-FS. These can include:
- Local mucosal reactions, mouth ulceration, tooth discoloration, dry mouth, stinging sensation in the mouth, mild headache, nausea, a worsening of existing symptoms, a disruption to taste, alterations in concentration and tiredness (in higher doses when mixed with other medications).

Although most symptoms should resolve on their own with time, as your body becomes used to CANIDOL®-FS. If any symptom is concerning you, contact your local pharmacy or UK Cannabis Clinic for assistance.

REPORTING SIDE EFFECTS

Store in a dark place out of direct sunlight.

KEEP OUT OF THE SIGHT AND REACH OF CHILDREN

Store in a SECURE place.

FURTHER DETAILS ABOUT THE PRODUCT

Food supplements, such as CANIDOL®-FS should not be used as a substitute for a varied diet and are not intended for diagnosis, or to treat, cure or prevent any disease.

CANIDOL®-FS has been developed to be a standardised full spectrum cannabis extract, containing a range of cannabinoids including cannabidiol (CBD).

INGREDIENTS & STORAGE

As CANIDOL®-FS is a natural product, a full list of ingredients, including all excipients, is available for each individual batch by downloading a Certificate of Analysis directly from our website. www.canidol.com

CANIDOL®-FS has a shelf life of approximately 24 months unopened. Due to the risk of bacterial contamination with the oral dropper, please discard any unused CANIDOL®-FS 30 days after opening.

Store below 25 degrees Celsius. Do not freeze. If the product becomes too cold, it may become cloudy. Allow product to warm to room temperature and shake the bottle before taking a dose.

PRESCRIBING INFORMATION

There is a prescription version of CANIDOL®-FS which is only available in a clinically monitored setting. This is called CANIDOL®.

Many patients hoping to improve their disease symptoms find that being part of a clinic allows for them to monitor their progress when taking CANIDOL®.

For more information on the prescribable product please email: prescribing@canidol.co.uk
